Capt. Mike,

Good timing. Attached is the Notice of Commencement for the Edgecomb project that I received this morning from MIS, better timing would have been Monday. He lists nine infrastructure steps with a project completion of August 1st. His application said he would need 180 days (six months) to complete the project. The award letter went out 11/4/07, six months would be May 4, but our rule says "approved proposals must be completed within one year of funding..." Do you still want me to set up a meeting with Jason or does the schedule in the notice of commencement work for now?

Thanks, Phil
